

Please make evry effort to not "dumb down" requiremens for radio privileges. Instead, consider making the privilege of radio use in our country a real hard-earned privilege. Stringent testing with no instant retesting in the same session, good technical understanding by the prospective liscensees, and a good working knowledge of Morse code as well as other modes are all important cornerstones in HF radio use.

Thanks you,

Robert B. Sparks    Amateur Extra Class AB5ZD - proud to be an American radio operator.
